

Credit Card Fraud Analytics

Interactive executive dashboard • descriptive analysis of observed fraud

Transactions
284,545

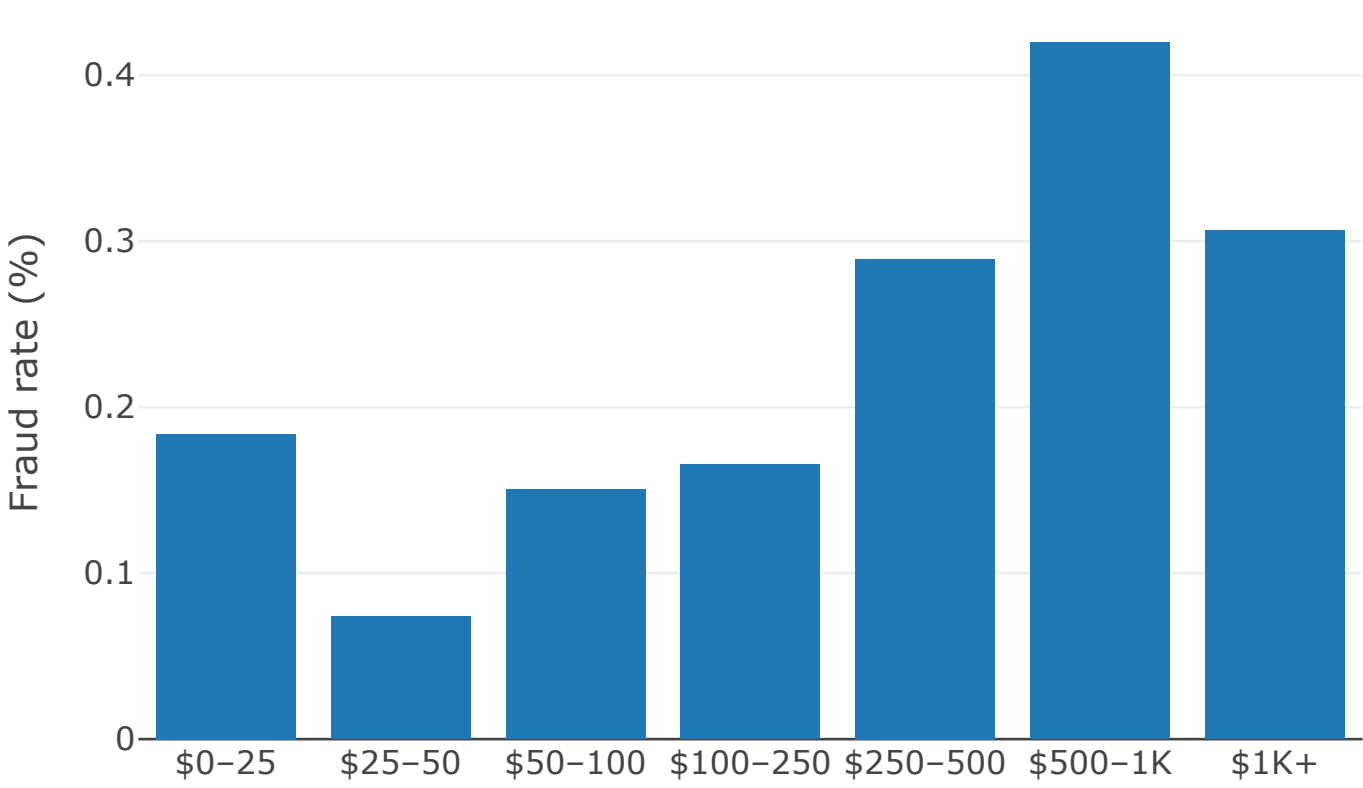

Observed fraud
492

Fraud rate
0.173%

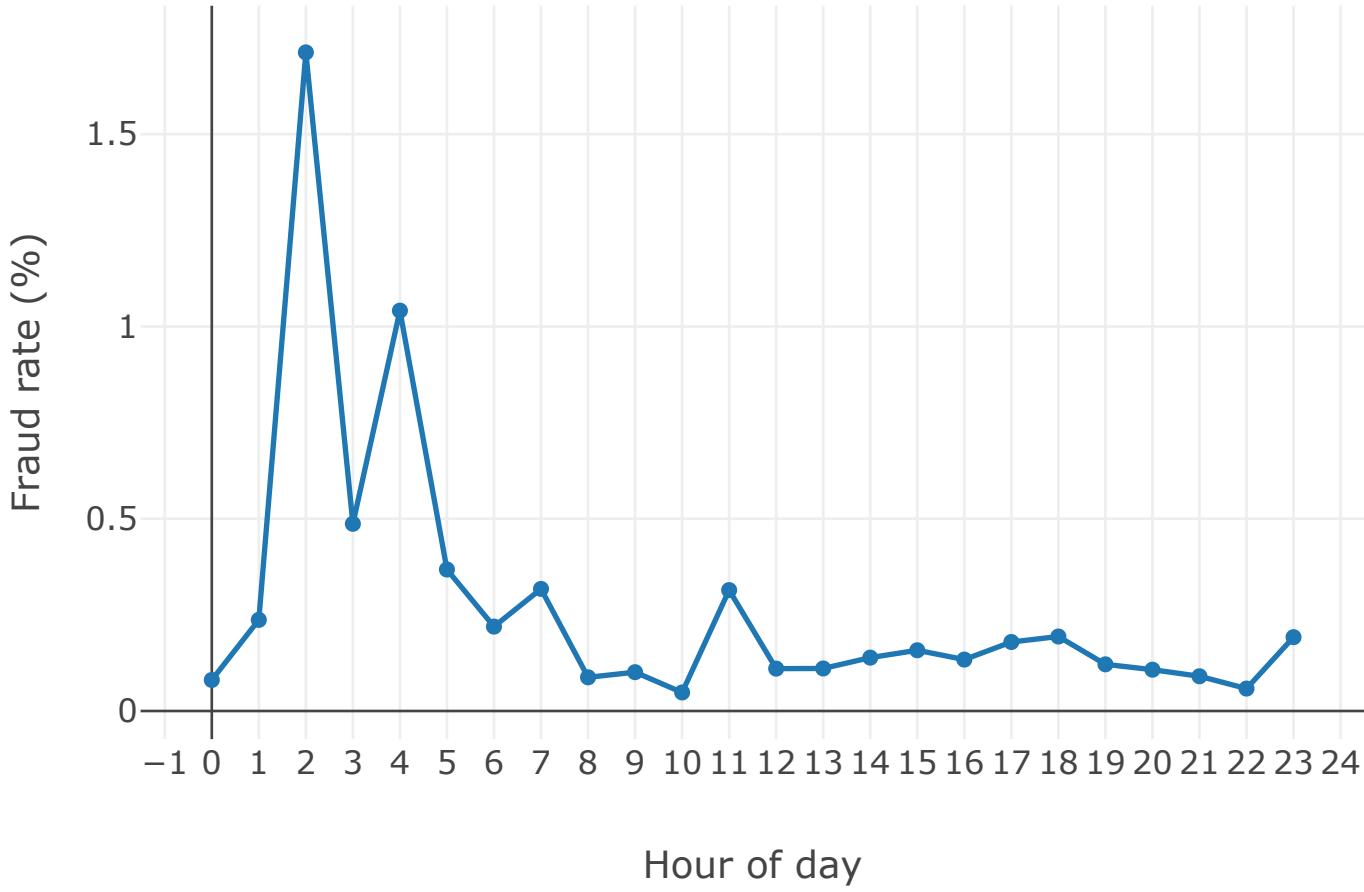

Fraud transaction value
\$60,128

Avg fraud amount
\$122.21

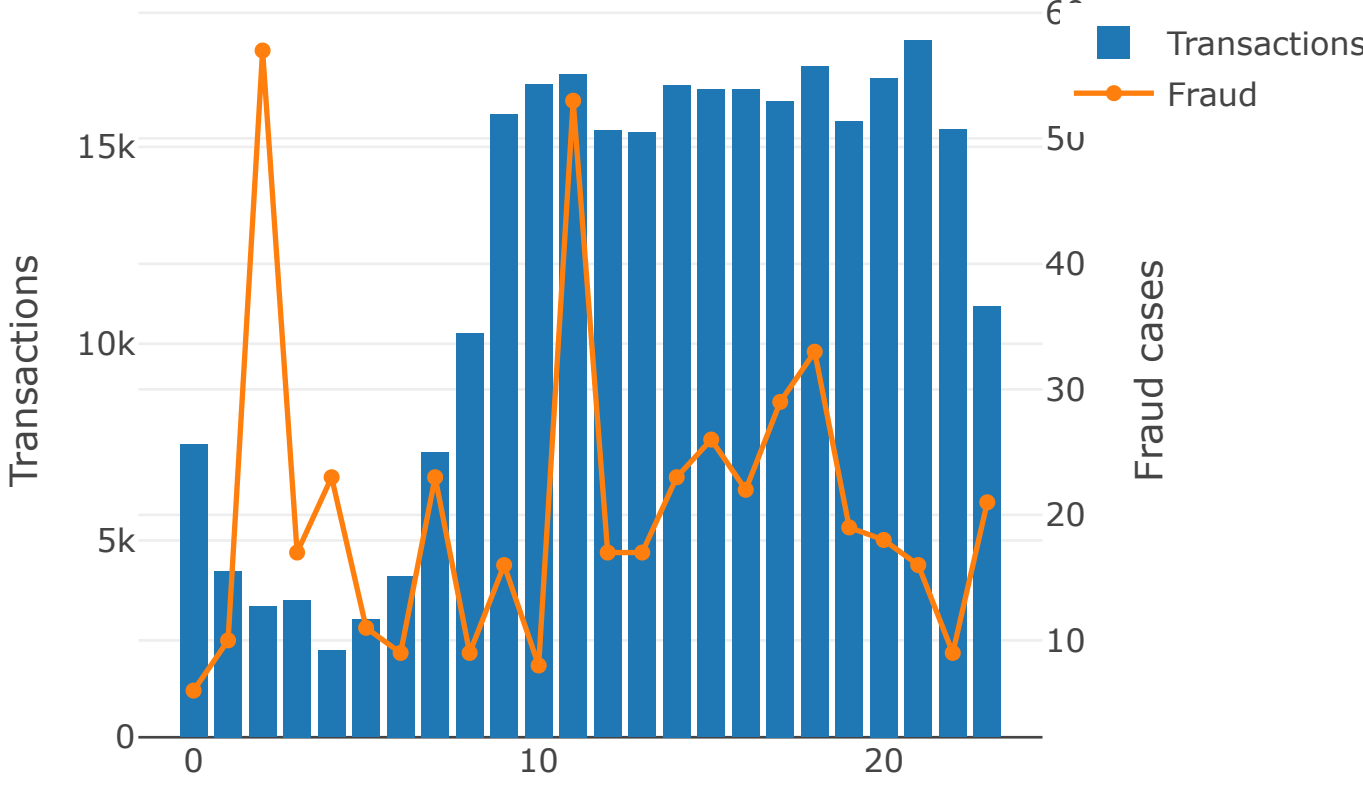

Observed fraud rate by amount band

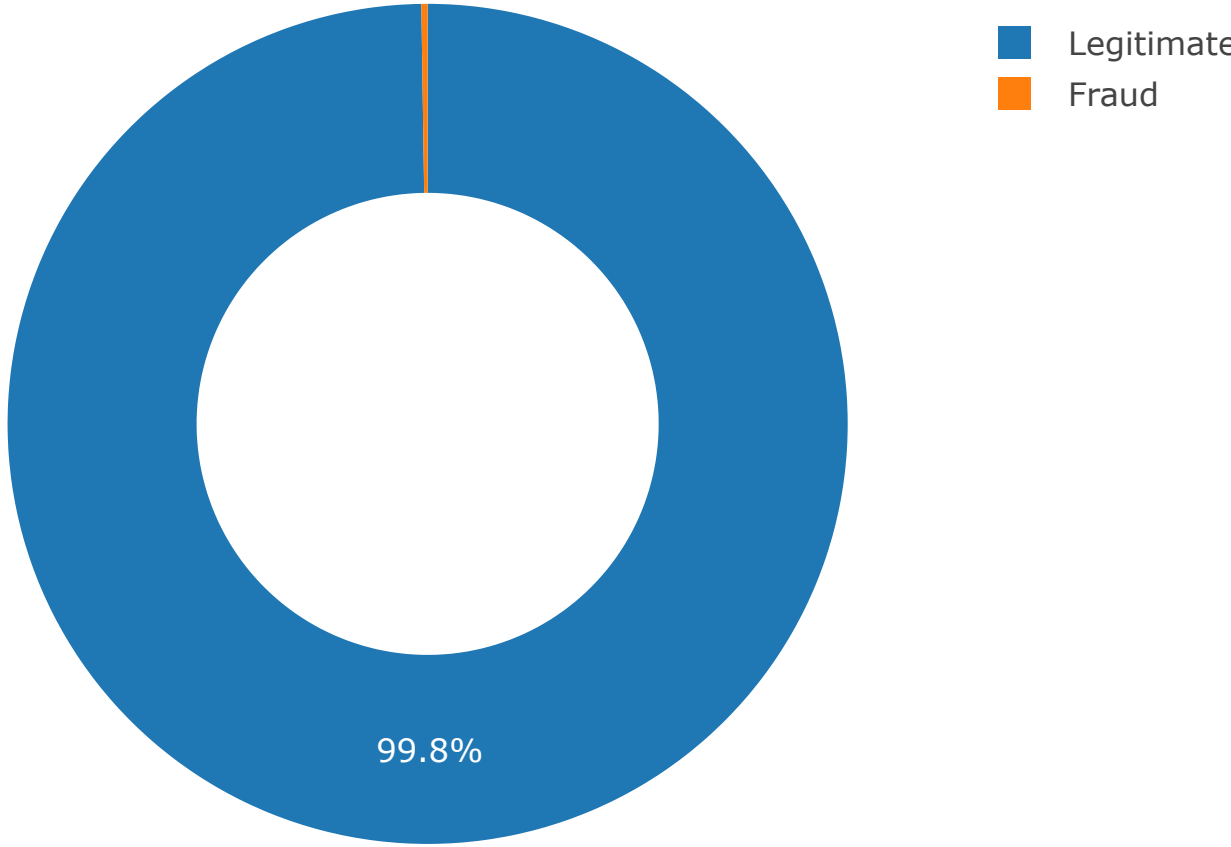

Observed fraud rate by hour

Transaction volume vs fraud cases

Transaction value by status

Business interpretation: Use fraud rate alongside transaction volume. A high rate based on very few transactions should not automatically receive the same operational priority as a high rate supported by substantial volume. The dashboard is descriptive and uses the dataset's observed labels.

Top observed fraud transactions by amount

Elapsed time (sec)	Amount	Hour
122608	\$2,125.87	10:00
9064	\$1,809.68	02:00
154278	\$1,504.93	18:00
62467	\$1,402.16	17:00
59011	\$1,389.56	16:00
65385	\$1,354.25	18:00
133184	\$1,335.00	12:00
18088	\$1,218.89	05:00
154309	\$1,096.99	18:00
147501	\$996.27	16:00

Data note: V1–V28 are anonymized PCA features. They are useful as analytical/model signals but do not have direct business meanings such as merchant, customer, geography, or device. 262 rows contain missing values and are excluded from the KPI calculations.
